

Anti Graffiti Coatings & Cleaning

Graffiti is an eye sore for any building in any area; once a building is tagged, it becomes a target for more graffiti and depreciates the value of the property and the surrounding area. In recent years, San Francisco has passed an ordinance placing fiscal and janitorial responsibility on the building owners to clean up all graffiti. All Graffiti must be removed within 30 days to avoid a Costly Penalty.

With these factors in mind, Baker's Floor Care now offers solutions for graffiti, from protective coatings for any surface to graffiti paint removing cleanings. Historically when graffiti occurs a new paint job is necessary to take care of the damage, this is costly, time consuming and redundant. Baker's Floor Care offers a protective coating that will coat almost any painted or non-painted surface, protecting it from spray paints, market inks and crayon.

In the event of recent vandalism before the protective coating, Baker's Floor Care has solutions to strip away the affected area. The area will be left cleaned and restored, ready for a protective coating to prevent further damage and vandalism.
